

## TO ASSEMBLE FLY-AWAY MECHANISM:

**PARTS:** 12-INCH STRING  
16 FOOT STRING  
PULL RING

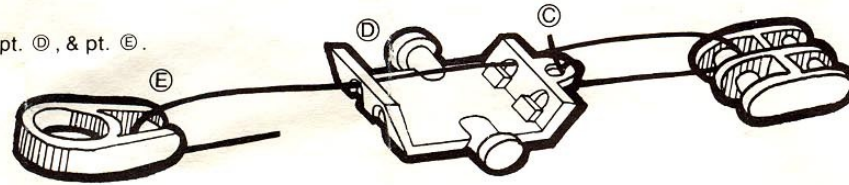

TOP PULLEY  
BODY CLIP  
ELASTIC BAN

1. Twist the three parts off the plastic frame and discard the frame.

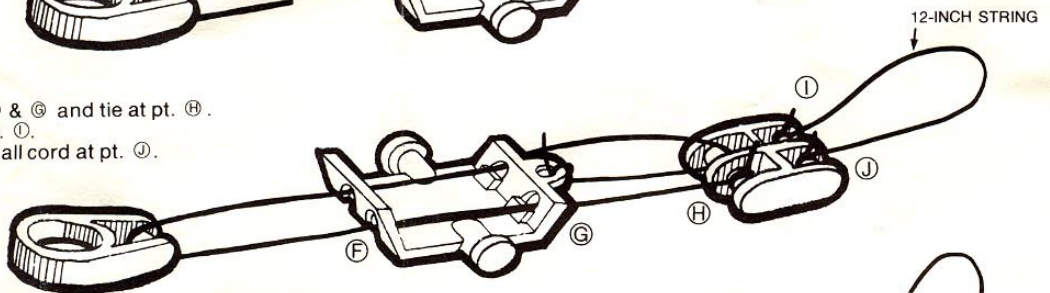

2. Tie cord to pt. (A). Pass through pt. (B).

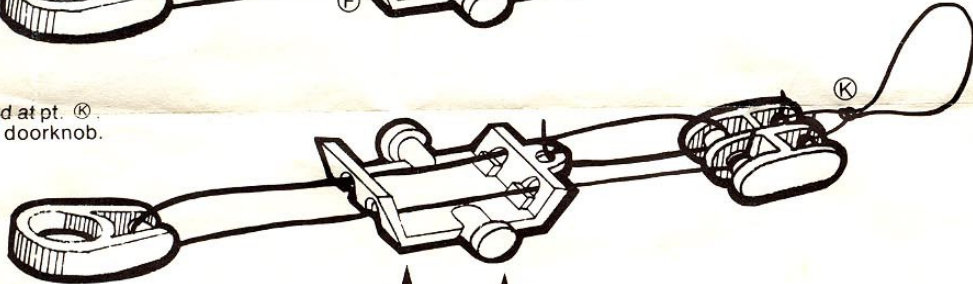

3. Pass through pt. (C), pt. (D), & pt. (E).

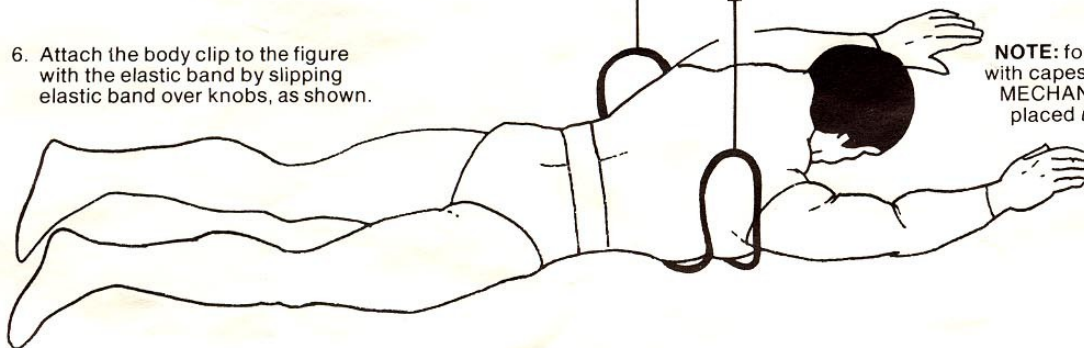

4. Pass through pt. (F) & (G) and tie at pt. (H).  
Tie small cord at pt. (I).  
Tie other end of small cord at pt. (J).

5. Tie knot in small cord at pt. (K).  
Loop should fit over doorknob.

6. Attach the body clip to the figure with the elastic band by slipping elastic band over knobs, as shown.

**NOTE:** for Super Heroes with capes, the FLY-AWAY MECHANISM should be placed *underneath* the cape.

## TO OPERATE FLY AWAY MECHANISM:

Hook the looped end of string onto a doorknob or door hinge, and place your finger in the pull ring. When you pull on the ring, your Super Hero will "fly" right up the string!

You can try different flying techniques by attaching the body clip onto other parts of the figure (arm, leg, etc.)
